DETAILED ACTION

Election/Restrictions

1. This application contains claims 9-10, 12-26, 28-29 and 31-32 drawn to an invention nonelected without traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Terminal Disclaimer

2. The terminal disclaimer filed on February 14, 2003 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent No. 6,289,650 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the light-shielding member being connected to the opening/closing lid must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3728

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 8, 27 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Kudo (4,992,815). Kudo `815 discloses a printing plate packaging box comprising: a box main body (13) which accommodates a bundle of photosensitive printing plates (11) and which is provided with a supply opening through which the photosensitive printing plates are taken out; an opening/closing lid (12) which is removably attached to said box for opening/closing the supply opening; and a light shielding member (groove portion (13b) and circumferential peripheral edge of lid (14), see Figure 1 embodiment and column 2, lines 34-38) which prevents direct entry of light from outside into the inside of the box main body, provided in the vicinity of a zone in which the box main body and the opening/closing lid are connected to each other in an assembled state, the light-shielding member (circumferential peripheral edge) being connected to the opening/closing lid such that the light-shielding member blocks the direct entry of light from outside into the inside of the box through the zone in which the box main body and the opening/closing lid are connected to each other in the assembled state.

6. Claims 8, 27 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Dirx (5,893,002). Dirx `002 discloses a printing plate packaging box comprising: a box main body (20) which accommodates a bundle of photosensitive printing plates (27) and

which is provided with a supply opening through which the photosensitive printing plates are taken out; an opening/closing lid (42) which is removably attached to said box for opening/closing the supply opening; and a light shielding member (frame 41, see column 4, lines 38-40) which prevents direct entry of light from outside into the inside of the box main body, provided in the vicinity of a zone in which the box main body and the opening/closing lid are connected to each other in an assembled state, the light-shielding member being connected to the opening/closing lid such that the light-shielding member blocks the direct entry of light from outside into the inside of the box through the zone in which the box main body and the opening/closing lid are connected to each other in the assembled state. See Figures (5 and 10 embodiments).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 11 is rejected under 35 U.S.C. 103(a) as being obvious over either of Kudo '815 or Dirx '002 in view of Lermer (5,495,944). Each of Kudo '815 or Dirx '002 as described above disclose all the limitations of the claim except for a smooth sheet-type material adhered to the outer surface of the packaging. Lermer '944 discloses that it is old and conventional to adhere a sheet-type material of which surface is smooth and airtight to the outer surface of a packaging in order to make it air tight (see column 1, lines 27-30). Therefore, it would have been obvious to one of ordinary skill in the art at

the time the invention was made to adhere a sheet-type material of which surface is smooth to the outer surface of the packaging of Kudo `815 or Dirx `002 as taught by Lerner `944 in order to make the packaging air tight and prevent the contents from damage.

Response to Arguments

9. Applicant's arguments with respect to claims 8, 11, 27 and 30 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are packaging boxes analogous to applicant's invention.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

12. Telephone inquiries regarding the status of application or other general questions, by persons entitled to the information "should be directed to the group clerical personnel and not to the Examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148 or the Tech Center 3700 Customer Service Center number is (703) 306-5648. For applicant's convenience, the Group Technological Center FAX number is (703) 872-9302. (Note that the Examiner cannot confirm receipt of faxes) Please identify Examiner Mohandesi of Art Unit 3728 at the top of your cover sheet of any correspondence submitted. Inquiries only concerning the merits of the examination should be directed to Jila Mohandesi whose telephone number is (703) 305-7015. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (703) 308-2672.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g. copies of references cited, form PTO-1449, for PTO-892, etc. requests for copies of such papers should be directed to Valerie Douglas at (703) 308-1337.
